

410_Producer_many_consumers.cpp

```
bool bReady; // used to tell
              // consumers to get
              // to work

bool bDone; // used to tell
             // consumers that
             // producer is finished

int gCount; // generic widget
            // for demo purposes
```
